## Our mission

INOX AIR Single-Member LLC is a Greek company operating in the field of catering equipment, offering comprehensive solutions in stainless steel constructions, ventilation systems, and other specialized constructions for professional spaces. The company is based in Tavros, Attica, and serves catering businesses, hotel units, and food industries, providing high-quality products and specialized services in design and maintenance of its manufactured products.

Our mission is to offer our clients not only superior products but also exceptional service, ensuring that every solution we provide meets the highest standards. With care and dedication, we strive to create products that enhance our customers' operations and contribute to their success.

## SINGLE-INLET CENTRIFUGAL FANS

**Specifications**

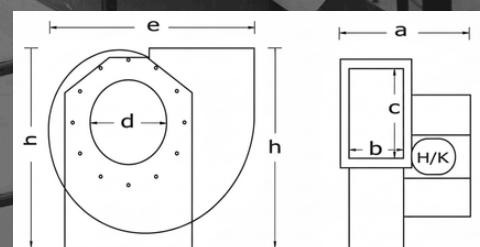

- **Low – Medium Pressure.**
- **High-spec electric motors, IP-55, class F.**
- **Forward-curved impeller, dynamically and statically balanced, with wide-spaced blades that allow easy cleaning and prevent grease deposits, increasing service life.**
- **Suitable for ventilation of professional kitchens, grills, industrial spaces, paint booths, etc.**
- **CE Certified.**
- **Casing made of galvanized steel sheet.**

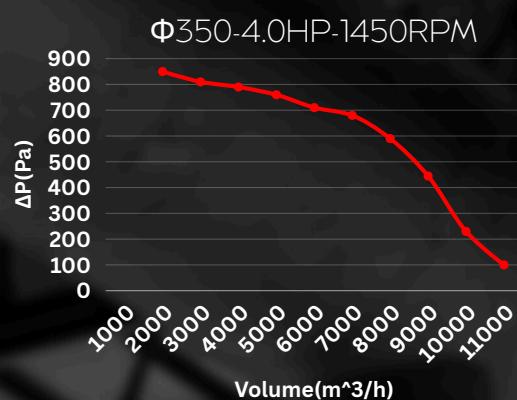

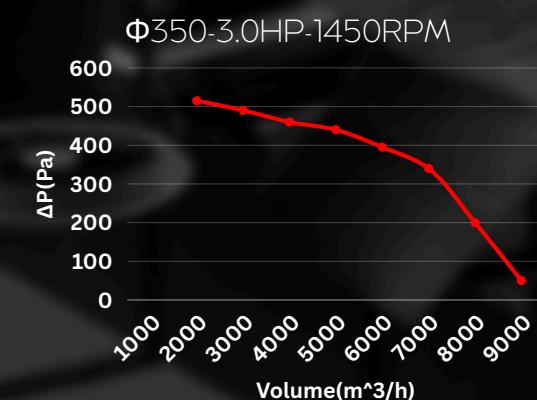

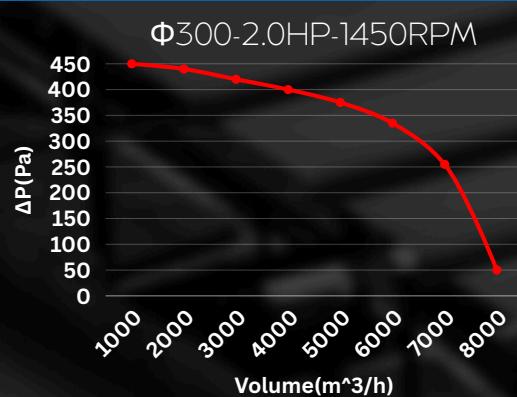

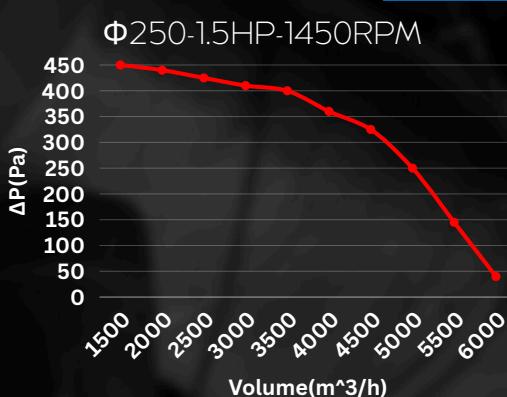

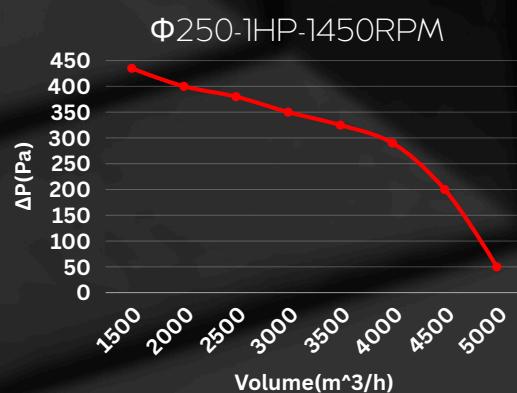

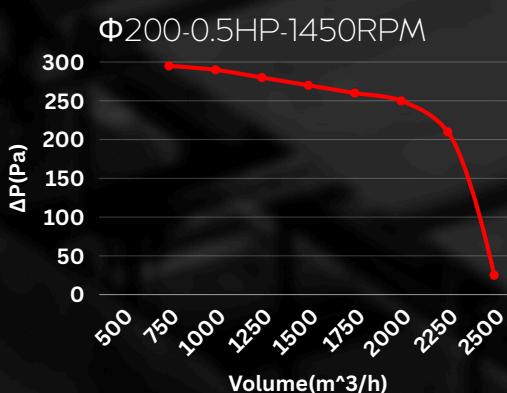

**Speed Control**

- **Speed controllers up to 1.5Hp at 220V.**
- **Inverter with 220V input for 380V motors up to 4.0Hp.**
- **Inverter with 380V input for all 380V motors.**

**Dimensions(mm)**

## SINGLE-INLET CASED CENTRIFUGAL FANS

**Speed Control**

- 5-step transformer at 220V.
- Inverter with input 220V for motors up to 2.2kW.
- Inverter with input 380V up to 4.0HP for all 380V motors.

**Specifications**

- The casing is made of galvanized steel profile with three-sided plastic corners and covers made of galvanized sheet metal, 0.7 mm thick, with internal insulation of 10 mm sound-absorbing material.
- Low to Medium Pressure.
- Electric motors of high specifications, IP-55 protection class F.
- Housing construction from galvanized steel sheet.
- Forward-curved impeller, dynamically and statically balanced, with wide-spaced blades that allow easy cleaning and prevent the accumulation of greasy residues, thereby extending service life.
- CE Certification.
- Suitable for the equipment of professional kitchens, grills, industrial spaces, paint booths, etc.

## SINGLE INLET CENTRIFUGAL FANS - INOX

**Speed Control**

- 5-step transformer up to 1.5HP at 220V.
- Inverter with 220V input for motors up to 2.2kW.
- Inverter with 380V input up to 4.0HP for all 380V motors

**Specifications**

- Low - Medium Pressure.
- High-specification electric motors, IP-55 protection, Class F.
- Housing construction from stainless steel AISI 304.
- Forward-curved impeller, dynamically and statically balanced, with wide-spaced blades that allow easy cleaning and prevent the accumulation of greasy residues, thereby extending service life.
- CE Certification.
- Suitable for the equipment of professional kitchens, grills, industrial spaces, paint booths, exhaust of oxidizing gases, and for installation in industrial areas with corrosive environments, chemical plants, foundries, etc.

## BELT DRIVEN CENTRIFUGAL FANS

IF-BD

**Specifications**

- Low – Medium Pressure.
- High-spec electric motors, IP-55, class F.
- Scoop-type impeller, dynamically and statically balanced, with wide-spaced blades that allow easy cleaning and prevent grease deposits, increasing service life.
- Suitable for ventilation of professional kitchens, grills, industrial spaces, paint booths, etc.
- CE Certified.
- Casing made of galvanized steel sheet.
- Belt and pulley drive system.
- Can be installed within a soundproof case.
- Provision for mounting a backup motor.

**Speed Control**

- Inverter with 220V input for 380V motors up to 4.0Hp.
- Inverter with 380V input for all 380V motors.

### SINGLE INLET SIROCCO EXHAUST FANS

#### Speed Control

- **15 up to 1.0HP at 220V.**
- **Inverter with 220V input for 380V motors up to 2.0HP.**
- **Inverter with 380V input for all 380V motors.**

#### Specifications

- **Medium-high pressure.**
- **High-quality electric motors, IP55 protection, Class F.**
- **Housing made of galvanized steel.**
- **Sirocco-type impellers, dynamically and statically balanced.**
- **CE certification.**
- **Suitable for the extraction of industrial kitchens, hotels, restaurants, industrial spaces, plastics industries, pharmaceutical industries, and for dust/fume extraction.**

*Option for installation of flange-mounted motors*

## CENTRIFUGAL EXHAUST FANS - HIGH PRESSURE

IA-IB

**Specifications**

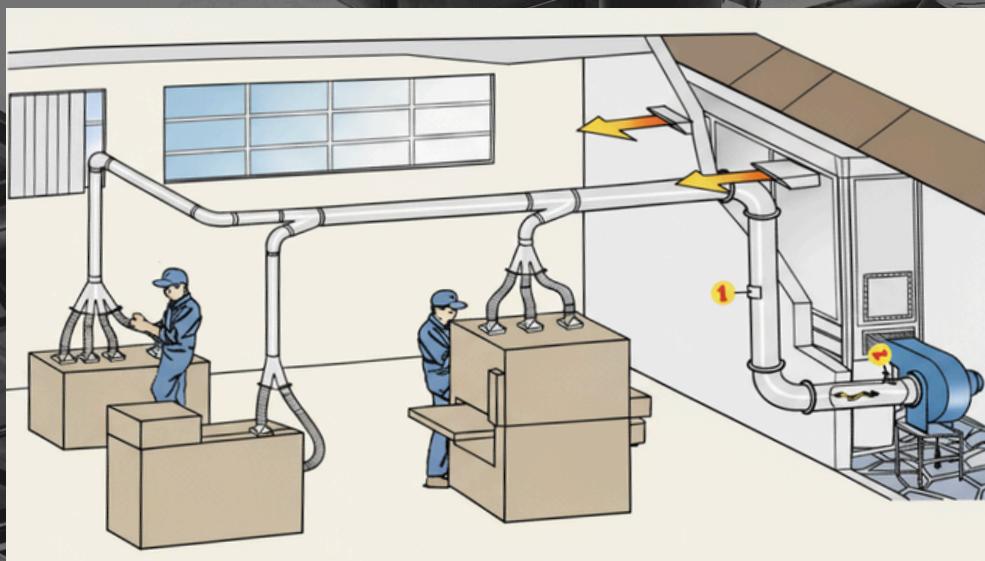

- **High pressure fans.**
- **High-quality electric motors, IP55 protection, Class F.**
- **Housing made of reinforced steel, specially designed for maximum durability.**
- **CE certification.**
- **Suitable for transferring solid particles as well as for air suction in industrial spaces where high pressure is required (e.g., foundries, cement factories, etc.).**
- **Option for installation inside a soundproof enclosure.**

**Speed Control**

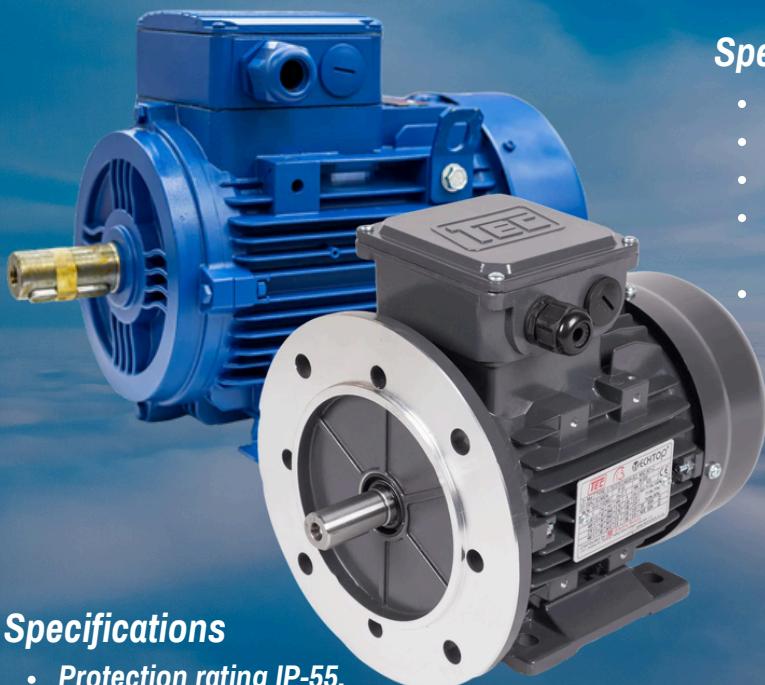

- Inverter with 220V input for 380V motors up to 4.0H.
- Inverter with 380V input for all 380V motors.

## CENTRIFUGAL EXHAUST FANS - DOUBLE INLET

**Specifications**

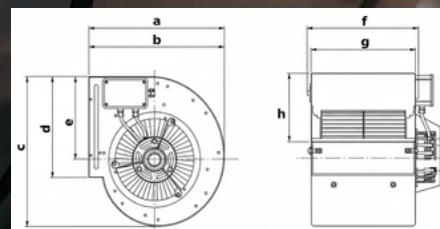

- Low-medium pressure.
- High-quality electric motors with thermal protection, IP55, Class F.
- Sirocco-type impellers, dynamically and statically balanced.
- Inside the housing, the fan is mounted on anti-vibration bases to absorb vibrations.
- Housing insulation thickness: 10 mm.
- CE certification.
- Suitable for ventilation of office buildings, professional spaces, or for installation in air handling units, HVAC systems, etc.
- Special custom constructions available upon request.

**Speed Control**

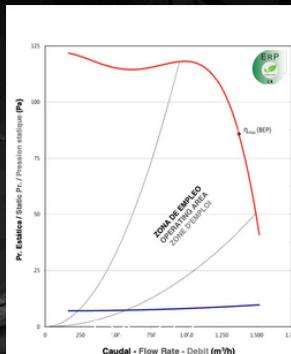

- P15 up to 1.5HP at 220V.
- Inverter with 220V input for 380V motors up to 4.0HP.
- Inverter with 380V input for all 380V motors.

## CENTRIFUGAL EXHAUST FANS - DOUBLE INLET

DA-1V

**Speed Control**

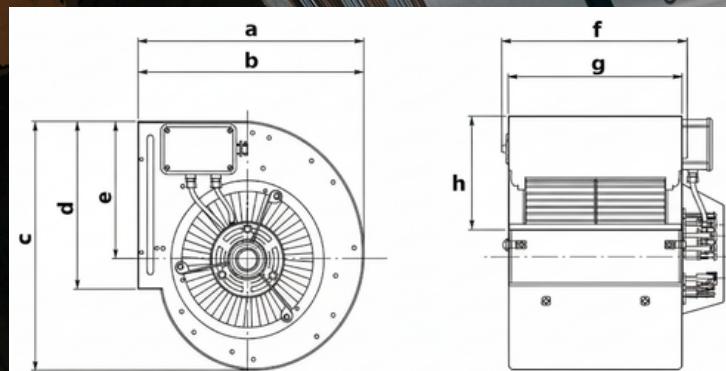

- P15 up to 1.5HP at 220V.**
- Inverter with 220V input for 380V motors up to 4.0HP.**
- Inverter with 380V input for all 380V motors.**

**Specifications**

- Low-medium pressure.**
- High-quality electric motors with thermal protection, IP55, Class F.**
- Sirocco-type impellers, dynamically and statically balanced.**
- Inside the housing, the fan is mounted on anti-vibration bases to absorb vibrations.**
- Housing insulation thickness: 10 mm.**
- CE certification.**
- Suitable for ventilation of office buildings, professional spaces, or for installation in air handling units, HVAC systems, etc.**
- Special custom constructions available upon request.**

The background of the entire image is a close-up, high-angle view of a large, curved, metallic duct or pipe system. The metal has a textured, slightly reflective surface with several horizontal welds or seam lines. A white rectangular logo is positioned in the upper left quadrant of the image. The logo contains the word "INOXAIR" in a bold, sans-serif font. The letter "O" in "INOX" and the letter "A" in "AIR" are partially cut off by the right edge of the white box.

## FLEXIBLE AIRDUCTS

### Non-Insulated

- Temperature -30°C to +150°C.
- Maximum Pressure 3.000 Pa.
- Maximum Speed 30m/sec.
- M1 Certification. Packaging 10m.

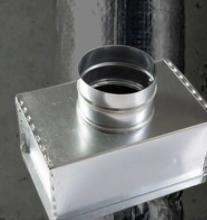

### Insulated

- 25mm Glass Wool Insulation.
- Temperature -30°C to +150°C.
- Maximum Pressure 3.000 Pa.
- Maximum Speed 30m/sec.
- M1 Certification.

## SOUND ABSORBERS - THERMAL INSULATION

**POLITHERM INSULATION IN A 20m SELF ADHESIVE ROLL**

Type	Dimensions	Price € / m
POLITHERM	20m X 1.2m X 5mm	Contact us

**POLITHERM** is a thermal and acoustic insulation material made of closed-cell polyethylene foam. It is durable, non-toxic, lightweight, and easy to apply. Temperature range: -40°C to +90°C. Main Applications: Insulation of air ducts, mechanical equipment, tanks, doors, walls, ceilings, and double glass frames.

**ALUMINUM INSULATION WITH SELF-ADHESIVE SHEETS**

Type	Dimensions mm	Price € / m <sup>2</sup>
POL.ALUM	1200 X 400 X 50	

**POLITHERM Aluminum** is a suitable and economical insulation, effective in all interior and exterior spaces.

It is a multi-layered material with polyethylene foam and it features an aluminum coating, offering material durability and excellent reflection (reflectivity over 90%). Main Applications: Insulation of air ducts, mechanical equipment, tanks, walls, ceilings, and double glass frames.

**EUROFLEX ACOUSTIC ABSORBING EGG-CRATE SHEETS**

Type	Dimensions mm	Price € / m <sup>2</sup>
EUROFLEX	2000 X 1000 X 50	

**EUROFLEX** is a fire-resistant and sound-absorbing material made of polyurethane, with an open-cell structure. It is non-toxic, odorless, and easily applied with water-based glue. The good balance of acoustic absorption, thermal insulation, and material cost makes it ideal for a wide range of applications. Suitable for: Acoustic treatment of recording studios, boiler rooms, elevator machinery rooms, air conditioning units, and general industrial applications.

**FIBERGLASS QUILT WITH ALUMINUM COATING**

Type	Dimensions	Price € / m <sup>2</sup>
IALO 30mm	24m X 1.2m X 30mm	

Fiberglass quilt in roll form, with a coating, easy to use and apply for thermal and sound insulation and fire protection.

**ROCK WOOL QUILT WITH ALUMINUM COATING**

Type	Dimensions	Price € / m <sup>2</sup>
PETR.30mm	9000 X 1000 X 30	

The rock wool roll is wrapped in durable aluminum coating. Fiberglass and rock wool are non-combustible materials that provide fire resistance.

Activated Carbon  
Filters

## ACTIVATED CARBON FILTERS

**Specifications**

- Casing made of galvanized sheet steel, with perfect sealing at the connection points, to prevent air leakage.**
- It features a filter diaphragm, activated carbon, and a synthetic fabric.**
- Ideal for odor retention in professional kitchens or polluted environments.**
- During installation, place the filter on the duct side, after the pre-filter, and before the extraction fan.**
- It requires a straight section pipe of 3 times its height for proper connection, to ensure good capture of particles.**
- Possibility of combined placement of activated carbon and activated alumina for greater odor retention.**
